PROFESSIONAL SUMMARY

Network Engineer and Cybersecurity Professional with over 5 years of experience supporting, maintaining, and optimizing enterprise network infrastructures across fast-paced and mission-critical environments. Skilled in network troubleshooting, systems support, cybersecurity operations, and ensuring secure, reliable connectivity across distributed IT environments. Experienced in working with routing and switching technologies, network monitoring tools, incident management processes, and security best practices to improve performance, uptime, resilience, and service reliability. Proficient in diagnosing complex network and security issues, implementing effective solutions, and collaborating with cross-functional teams to support business operations and protect critical assets. Possesses a strong foundation in network security, threat detection, vulnerability management, and security monitoring, with a commitment to maintaining secure and compliant IT environments. Highly adaptable and eager to learn emerging technologies, with a strong dedication to continuous improvement, innovation, and professional development.

Known for being proactive, detail-oriented, and dependable in both hybrid and on-site environments. Open to international opportunities and relocation, and excited to contribute technical expertise, cybersecurity knowledge, and problem-solving capabilities to organizations seeking reliable, secure, and scalable technology solutions.

TECHNICAL SKILLS

- System Architecture & Integration.
- Non-Functional Requirements (Performance, Scalability, Reliability).
- Technical Troubleshooting & Root Cause Analysis.
- Network Security & Vulnerability Assessment (Nmap, OpenVAS).
- Product Lifecycle Support.
- API Integration & System Testing.
- Agile & Cross-functional Collaboration.
- Technical Documentation & Customer Support.
- Adaptability & Continuous Learning.
- Network Troubleshooting (LAN/WAN, VPN, DNS, DHCP).

PROFESSIONAL EXPERIENCE

GLOBALCOM TELECOMMUNICATION COMPANY, NIGERIA

Network Operations Centre (NOC) Information System Engineer | [April 2021- Till present]

- Provided escalated Level 2/3 technical support for nationwide network infrastructure, troubleshooting complex hardware, software, and network issues affecting 2G, 3G, and 4G services.
- Resolved critical network incidents on PS Core, DWDM, and IP-MPLS systems, reducing average resolution time by 25% through developed troubleshooting procedures.
- Documented and maintained detailed records of all support activities, incidents, and resolutions in technical reports for network and operations heads.
- Developed and implemented automated alert systems that reduced incident response time by 66%, significantly improving service delivery.
- Created comprehensive troubleshooting SOPs and trained junior engineers, improving team capability and reducing dependency on senior staff.
- Collaborated with cross-functional teams including security, development, and customer support to ensure seamless service delivery and customer experience.
- Developed security monitoring dashboards using Splunk and Grafana for proactive issue identification and resolution.

Jiji Nigeria

Data Analyst & Customer Support Representative | March 2019 – February 2021

- Handled 80+ technical and customer service inquiries daily with a 95% satisfaction rate, resolving escalated issues from frontline support.
- Implemented a feedback system that improved response times by 75%, enhancing overall service delivery.
- Built interactive dashboards that reduced internal reporting time by 50%, streamlining support documentation processes.

Identified and addressed systemic issues through data analysis, leading to 20% annual cost saving in support operations.

Cybersecurity & Network Analyst (Projects)

Independent Projects / GitHub Portfolio

- Developed an Automated Pen testing Tool using Python & Nmap with real-time vulnerability detection.
- Performed network scanning, service enumeration, and security assessments.
- Built structured vulnerability reports with actionable remediation insights.
- Simulated real-world system environments to test performance and resilience.

PROJECT HIGHLIGHTS

- **Automated Nmap Pen Testing Tool (Flask Web Interface) <http://127.0.0.1:5000/>**
- Designed a web-based interface for automated vulnerability scanning using IP-based inputs.
- Integrated real-time scan results with clear reporting for security insights.
- Focused on scalability and usability for technical and non-technical users.

EDUCATION

- **Ekiti State University, Ado Ekiti, Nigeria**
 - **Bachelor of Engineering in Electrical/Electronic Engineering** | September 2016
 - Research Area: Analyzing Wireless Network Security Economics and Privacy.
- **St. Alphonsus De Liguori Private Secondary School, Lagos, Nigeria**
Senior School Certificate (SSCE) | September 2008.

TECHNICAL SKILLS

- Languages/Tools: Python, Nmap, Flask, Linux, Git
- Networking: TCP/IP, DNS, HTTP, Network Scanning
- Security Tools: OpenVAS, Wireshark (basic).
- Other: System Monitoring, Log Analysis, API Testing.

CERTIFICATIONS & TRAINING

Cyber Threat Management | Cisco Networking Academy |2026

Oracle Cloud Infrastructure AI Foundations (Foundations Associate) |Oracle Certified |2025

Introduction to Cybersecurity | Cisco Networking Academy |2025

Airtable Admin Certification | Airtable | 2025

CCNA (Certified No:C7C598AA) |Mindlustre (Certified Member) | 2024

Copy Writing |Avant Garde Certificate (Live Your Dreams Africa) | 2023

ADDITIONAL INFORMATION

- Experienced in supporting enterprise network infrastructure, remote users, and hybrid IT environments across distributed locations.
- Strong understanding of networking fundamentals including TCP/IP, DNS, DHCP, VPNs, routing, switching, and wireless connectivity.
- Skilled in technical documentation, reporting, asset management, and maintaining accurate network records and configurations.
- Effective communicator with strong stakeholder engagement and cross-functional collaboration skills in multicultural and technical environments.
- Adaptable and quick to learn new technologies, tools, and operational processes within fast-paced infrastructure environments.
- Committed to continuous professional development with growing interests in cybersecurity, cloud networking, and infrastructure automation.
- Comfortable working independently or collaboratively within remote, hybrid, and international technical teams.
- Open to relocation and motivated to contribute to innovative, customer-focused, and globally connected organization.
